

# how your support will help

## ► serve our growing population

When faced with a medical emergency, you want expert care — immediately. In Josephine County, Asante Three Rivers Medical Center Emergency Department provides that care.

Each year, more than 40,000 people receive care at the Grants Pass Emergency Department. That number continues to grow, making it one of the busiest Level III trauma centers in Oregon.

To meet the increasing demand and to provide the community with the very best emergency care, Asante Three Rivers Medical Center is expanding its emergency department.

### *Benefits of the new Emergency Department:*

- *Reduced wait time*
- *More patient beds, from 19 to 30*
- *Improved technology for advanced care*
- *Increased patient privacy*
- *Greater comfort for waiting families*
- *A helicopter landing zone for immediate transfers into and out of the hospital*

## ► provide better access to critical care

The current Emergency Department opened in 2001 and was built to serve 27,000 patients annually. With a nearly 50% increase in patient volume over the past 18 years — and sustained growth expected each year — there's an urgent need to expand and modernize. That's where your help is critical.

The Emergency Department is crucial to saving lives. We need your help to give the people and families who call Josephine County home, and the visitors who come to enjoy all the community has to offer, the best possible emergency services with the best possible outcomes.

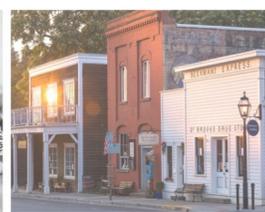

*Mary Lou suffered a stroke and was taken to Asante Three Rivers Emergency Department. Her daughter recalls the experience:*

*“It’s very comforting to know that even though we live in a small community, we have access to all of the technology that’s available in the larger cities.”*

*- Evelyn Smith*

*Mary Lou was back home on her farm within a couple days with no complications.*

## ► create a capable and comforting environment

This much-needed project will have an immediate and positive impact on emergency care in our community, including:

*The renovation and expansion project will double the square footage of the Emergency Department.*

- Increasing the number of patient rooms, reducing wait times, and treatment delays.
- Allowing room space to be adapted to meet specific needs of the patient, from minor to critical conditions, improving efficiency and patient outcomes.
- Enlarging the waiting room for more comfort and privacy.
- Adapting treatment rooms for people experiencing mental health challenges to offer a calming and healing environment.

## ► equip our region with best-in-class health care

GIFT LEVEL	# OF GIFTS	# PROSPECTIVE DONORS	TOTAL \$\$
\$1,000,000	1	4	\$1,000,000

Through philanthropy, you can help Asante invest in our community to provide vital, life-saving services. We invite you to become part of this team that mends broken bones, saves lives, and brings comfort during a frightening time.

Our goal is to raise \$3 million for expansion of the Emergency Department. To meet that goal, we're depending on the generosity of donors like you who want to participate in a project that will have an incredible impact on the well-being of you, your loved ones, and our community for years to come.

Gifts can be made using the timeline and vehicle that best meets your philanthropic goals. To celebrate your commitment, we'll work with you on recognition that's appropriate for your generous gift. Top recognition and naming opportunities begin at the \$1 million level.
