

Why does Asante Foundation need your support?

Asante hospitals provide **42,000** patient visits for **22,500** kids every year.

Every month, Asante hospitals treat:

7 kids with cancer

229 babies born

581 kids for surgeries

1,000 children for general medicine needs

62 children enter an Asante hospital for treatment every day

Since 1980, the community has raised **\$24 million** for children's health care. 100% of those funds are directed to areas of greatest need.

Asante Rogue Regional Medical Center has been a designated Children's Miracle Network hospital since 1988. Because of the high-level care Asante has available for babies and children, families can receive treatment close to home, right here in Southern Oregon.

You can help Asante build a new children's hospital-within-a-hospital to meet the growing needs of local kids – the future of our community.
